This article discusses the important features of intestinal function in animal models of sepsis and acute pancreatitis. Although there is some variation in intestinal function in different animals, there is a common pattern of impaired responses to colorectal distention, a significant delay in the disappearance of fluid from the intestinal lumen, and an inability to heal the mucosal barrier. Together with the recent work from our group and others, these findings point to a central role for an enterotoxin or enterotoxin-like molecule and specific type-B toxin-mediated mechanism(s) in the pathogenesis of these conditions. Finally, the potential role of the gut in the systemic response to a large acute abdominal viscus injury is discussed. is unlikely that the drug itself will cure any illness, but rather that it will be useful in the treatment of illnesses that do not respond to conventional drugs. Here, the improvement of the treatment in the elderly may not be achieved by adjusting the dose of the drug, but rather by selecting a drug which is less liable to lead to the side effect of ED. In general, the occurrence of adverse effects is more frequent in older patients. Among them, the most frequent side effect of Tadalafil is headache. Although this side effect was less frequent than expected, we have reported similar cases^{[@r06],[@r12],[@r13]}. Since we had no other cases after a careful evaluation, we speculate that the appearance of this 82157476af
